## **DETAILED ACTION**

This Notification of Defective Appeal Brief is being provided in response to the Appeal Brief filed on 12/06/04.

In this regard, it is noted that under 37 CFR 1.191(a), an applicant for a patent dissatisfied with the primary examiner's decision in the second or final rejection of his or her claims may appeal to the Board for review of the examiner's rejection by filing a notice of appeal and the required fee set forth in 37 CFR 1.17(b) within the time period provided under 37 CFR 1.134 and 1.136. A notice of appeal may be filed after any of the claims has been twice rejected, regardless of whether the claim(s) has/have been finally rejected. The limitation of "twice or finally...rejected" does not have to be related to a particular application. For example, if any claim was rejected in a parent application, and the claim is again rejected in a continuing application, then applicant will be entitled to file an appeal in the continuing application, even if the claim was rejected only once in the continuing application (See MPEP 1205 Notice of Appeal).

In this instance, the present appeal brief fails to meet the requirement of having the claims twice rejected simply because the appealed claims and their intended subject matter have not been twice rejected by the examiner. That is to say, the intended amendment of 10/14/04, the substitute amendment of 11/01/04, and the supplemental amendment of 11/09/04 incorporating new limitations into the claims (i.e. the specific foot print area as low as 0.001 cm² in claim 21; and the specific footprint within a range of les than 1 cm² to 0.0001 cm² and the connotation of the micro-fabricated limitation in claim 33) were never made of record and officially entered due to its non-compliant condition as set forth in various Notices of Non-Compliant Amendment

dated 10/22/04 and 11/15/04 identifying the lack of a complete listing of all of the claims, and/or in the Failure to Acceptably Respond to Notice of Non-Compliant Amendment of 11/23/04. The foregoing non-compliant communications were issued by the Technical Support Team of PTO, and they do not reflect, in any way, an official examination on the merits of claims. Thus, since the appealed claims include non-entered amendments and unexamined subject matter, it is contended that the appealed claims have not been considered and examined on their merits. Additionally, the appeal is not in compliance with 37 CFR 41.31(a)(1) in that no claim has been twice rejected. That is to say, the appeal brief is premature because the present claims on appeal have not been twice rejected in their entirety. In other words, the present claims contain newly added subject matter that has not been addressed or considered by the examiner.

In consequence, the appeal brief is defective as it unfairly appeals subject matter not twice rejected or considered by the examiner; and ultimately, never considered and examined on the merits by the examiner. To remedy this defectiveness, applicant is suggested to either: a) cancel or delete the newly added limitations (the limitations newly added in the amendment notentered) so as to fairly appeal the examiner's rejection based on the <u>original claimed subject matter</u> of the current application; or b) withdraw the appeal brief and allow the application to continue its regular course of action and examination. If applicant desires to adopt any of aforementioned suggestions or any other action, applicant is still reminded of his obligation to submit a proper reply addressing this issue so as to avoid an abandonment due to applicant's failure to offer a proper reply timely filed.
